Dr. Fauci, America's "Mr. Covid," is under intense scrutiny from the Senate Homeland Security Committee, chaired by Republican Senator Rand Paul. The president accuses Fauci of lying about the Covid-19 pandemic, the origins of the virus, the measures taken, and of concealing the dangers of the vaccines, particularly for pregnant women.

(https://reseauinternational.net/mentions-legales/)

Dr. Fauci is accused of concealing the origins of Covid-19 and misleading the public about the disease.

From the media spotlight to the darkness of guilt: in early August 2026, Dr. Anthony Fauci, the chief medical advisor to both Trump and Biden's White Houses, and former director of the National Institute of Allergy and Infectious Diseases (NIAID), once again found himself in the witness box (https://www.medias-presse.info/docteur-fauci-congres-audience-justice/191300/) before the Senate Homeland Security Committee, chaired by Republican Senator Rand Paul. The Brooklyn-born doctor, who was America's "Mr. Covid," was summoned to testify after being subpoenaed by the president, who accused Fauci of concealing the origins of COVID-19 and misleading (https://www.medias-presse.info/crise-sanitaire-le-docteur-covid-americain-fauci-pris-en-flagrant-delit-de-mensonges/147872/) the public about the disease.

Meanwhile, three state attorneys general have also subpoenaed Fauci to appear in a joint investigation against the former US Covid-19 top official.

Fauci's "diary" exposes Fauci's lies

To support their accusations and questions, members of the Senate Homeland Security Committee obtained more than 34,000 text messages and 522 voicemails, as well as a multitude of emails from Fauci's government-provided computer and cell phone, and therefore government property. These internal notes, which Rand Paul and others have taken to calling Fauci's "diary," suggest that America's "Mr. Covid" publicly exaggerated the COVID-19 death rate compared to what he wrote privately, concealed its origin, and downplayed the dangers of COVID-19 vaccines.

Rand Paul claims that Fauci's daily reports and text messages contradict his frequent public statements, particularly regarding the effectiveness of masks, social distancing, and the origins of COVID-19. He specifically highlighted a memo attributed to Fauci in 2020, in which he allegedly stated that the first infection did not originate from a live animal market, something he has never said publicly.

Fauci and the vaccination of pregnant women and the concealment of the risks to the fetus

These thousands of messages from Dr. Anthony Fauci offer new insights into his private discussions during the Covid-19 vaccine rollout. One exchange concerning a theoretical concern related to vaccination, fever, and pregnancy is being re-examined in Congress, with lawmakers comparing Fauci's private conversations with his public statements from that time.

Senators Ron Johnson and Rand Paul released the first batch of text messages from Dr. Anthony Fauci's government iPhone on August 10, 2026. In a January 2021 exchange (https://nypost.com/2026/08/10/us-news/fauci-warned-of-miscarriage-risk-linked-to-covid-vaccine-while-publicly-claiming-no-issues-newly-released-texts-show/) , Dr. Fauci, CDC Director Rochelle Walensky, and Surgeon General Vivek Murthy discussed COVID-19 vaccination for pregnant women and the associated risks. Fauci raised a potential concern after the second dose of the vaccine, writing that many women experience a *"significant cytokine storm and fever,"* and that this could *"theoretically be associated with first-trimester miscarriage* . "

(https://reseauinternational.net/mentions-legales/)

The concealment of the risks of miscarriage after Covid vaccination

But a few days later, on February 3, Anthony Fauci stated during a live Q&A session with the *Journal of the American Medical Association* (*JAMA*) that the FDA *"has not found so far, and we need to be cautious, but so far no red flags on this, regarding pregnant women* ." Then, in April 2021, CDC Director Rochelle Walensky explained to the media:

"There are no safety concerns for pregnant women or their babies . "

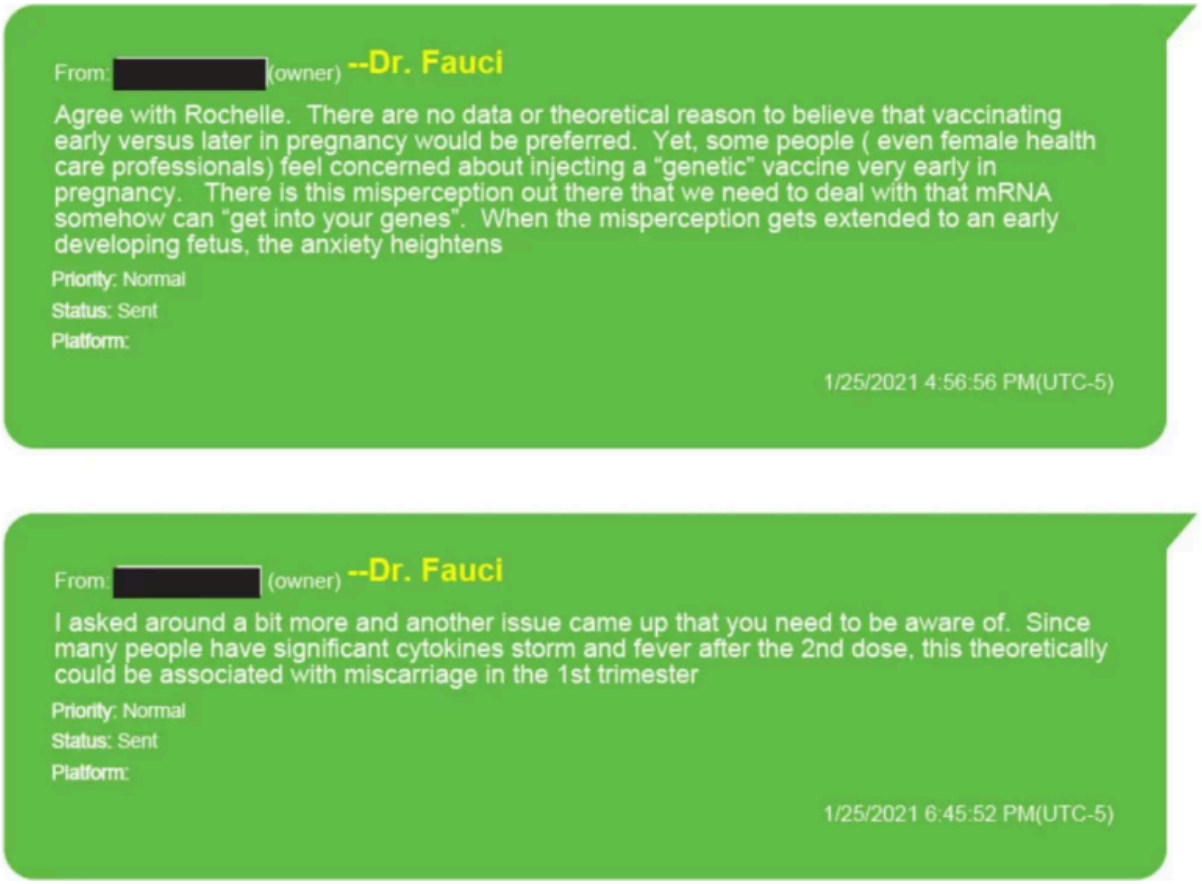
Months later, Biden's chief medical advisor to the White House was still stating:

"Tens and tens of thousands of women followed by the CDC, who were vaccinated during their pregnancy, have absolutely no indication of an increase in adverse effects in a vaccinated pregnant woman compared to an unvaccinated pregnant woman... so it is pretty clear that pregnant women should get vaccinated . "

On August 30, 2021, he also stated, urging women to get vaccinated:

"This is really one of those cases that is not at all obvious. It is quite clear that pregnant women should get vaccinated . "

Thus, he knowingly concealed from millions of Americans the fact that the cytokine storm of a 2nd dose could be associated with a miscarriage.



From: [redacted] (owner) --Dr. Fauci
Agree with Rochelle. There are no data or theoretical reason to believe that vaccinating early versus later in pregnancy would be preferred. Yet, some people (even female health care professionals) feel concerned about injecting a "genetic" vaccine very early in pregnancy. There is this misperception out there that we need to deal with that mRNA somehow can "get into your genes". When the misperception gets extended to an early developing fetus, the anxiety heightens

From: [redacted] (owner) --Dr. Fauci
I asked around a bit more and another issue came up that you need to be aware of. Since many people have significant cytokines storm and fever after the 2nd dose, this theoretically could be associated with miscarriage in the 1st trimester

The deliberate lack of transparency regarding the side effects of anti-Covid vaccines

Interrogé également par le Comité sénatorial, le docteur Robert Redfield, ancien directeur des Centres pour le contrôle et la prévention des maladies (CDC), a confirmé sous serment qu'il y a eu un manque de transparence volontaire sur les effets secondaires des vaccins anti-Covid. Il a déclaré que certains ont choisi de sous-déclarer les risques pour ne pas freiner la vaccination. Le mécanisme au sein des responsables chargé d'élaborer les réponses au covid était clair : minimiser les alertes pour maximiser l'adhésion du public. Redfield a même ajouté que l'obligation vaccinale fut une erreur majeure, car ces produits ne stoppaient pas la transmission.

Au moins cinq États des États-Unis, la Floride, la Louisiane, l'Alabama, l'Oklahoma et la Virginie-Occidentale, ont déjà annoncé ou confirmé des enquêtes en cours et de possibles procès contre Fauci. Le procureur général de Floride, James Uthmeier (https://nypost.com/2026/07/30/us-news/florida-investigating-fauci-for-potential-physical-and-monetary-harms-to-residents-during-covid/), a déclaré qu'il allait ouvrir une enquête sur le Dc Anthony Fauci, suite à la décision explosive de Fauci d'invoquer son droit au silence (cinquième amendement) et de ne répondre à aucune question lors d'une audition au Congrès mercredi. *«Le manque de franchise de Fauci devant le Congrès est incroyable. Mon bureau lance une enquête sur le Dc Fauci. Il est grand temps de connaître la vérité sur ce qui s'est passé pendant la pandémie de COVID»*, a écrit Uthmeier dans un message publié mercredi sur X.

Ainsi, pendant des mois, on a traité de complotistes (https://www.medias-presse.info/le-docteur-fauci-le-monsieur-covid-americain-la-pandemie-la-fuite-de-ses-mails-et-ses-cachoteries/143266/) ceux qui parlaient d'effets secondaires des sérums anti-Covid, alors que des responsables savaient et se taisaient. Des femmes du monde entier ont perdu leurs bébés à cause de cela…

However, the article refers to serum, not vaccines. Serums and vaccines are very different and are not used under the same conditions at all.

The problem is that this piece of trash is just a scapegoat, like Madoff in 2008. We execute one dirty trick so that others can continue their dirty tricks in the shadows without being bothered.

Bill Gates will never be held accountable, as we suspected.
And even less so the bigwigs of the BIS and other organizations enjoying total legal immunity.

Yes, good point!
Who bought off Fauci, the WHO, etc.?
Who invented the scapegoat?

He's not just a minor figure; he's the architect of the global COVID-19 vaccination policy, and attacking him with real arguments isn't without merit. People in the shadows, by definition, can't be held accountable because they're in the shadows, so it's already challenging those who have

been most exposed. Gates has a case against him in the Netherlands; admittedly, it will be difficult to convict him, but it discredits people whom we didn't even dare criticize.

Finally, the door is open! We're getting to the heart of the matter, and in the United States!!! State prosecutors and members of Congress are charging Fauci, who knew the dangers of the COVID vaccine for pregnant women and yet encouraged them to get vaccinated, knowingly endangering the lives of their fetuses… a kind of premeditated mass murder charge… so much the better for the "noise" this is creating in America, which must be frightening the WHO, on the front line, and all its agents! A kind of second Epstein affair! Now, if American elected officials are trying to shed light on COVID, and it seems they are now, they haven't finished their discoveries and revelations to the public! It's already gone too far; he won't be able to avoid THE TRIAL!
